

## FROM ORDER ENTRY

TO

## FINAL SHIPMENT

### THE PATENTED MULTI-CARRIER SHIPPING TECHNOLOGY

ConnectShip | iShip provides the patented multi-carrier technology for 20% of the top 100 companies on the Fortune 500. ConnectShip | iShip solutions are scalable and customizable, and give you the ability to go from doing business within the local market to the global marketplace, whether you're shipping 50 or 50,000 packages daily.

### REGIONAL, LTL, SMALL PACKAGE, AND FREIGHT

From order entry to final shipment, the ConnectShip multi-carrier compliance engine helps companies save money, reduce expenses, and get the product in the hands of the customer.

ConnectShip | iShip solutions provide multi-carrier compliance whether you ship with major international carriers, regional carriers, or LTL and air freight carriers. With our patented multi-carrier software, you will know that your labels and other shipping documents are fully compliant, reducing errors, fees, and delays for customers.

### FLEXIBILITY AND SCALABILITY

**Flexibility.** One of the most valuable aspects of using ConnectShip | iShip as your shipping engine is the flexibility of the software. Integrate shipping or shipment rating into an ERP, warehouse management system, your website, or other business systems. As your business grows, scale the solution by adding components and additional shipper locations, including international origins.

### CONNECTSHIP | ISHIP

- Backed by UPS, with the financial security of the world's largest parcel shipping company.
- Multiple-carrier shipping and return labels, electronic manifesting, rating comparisons, and shipping documents.
- Innovations in shipping software such as Prologistics AMP, an XML message-based interface to ConnectShip | iShip functionality that enables standard web service and custom message processing.
- Integration to multiple systems including Oracle and SAP applications.
- Numerous patents for Logistics System for Automating Transportation of Goods

**CONNECTSHIP | ISHIP TECHNOLOGY**

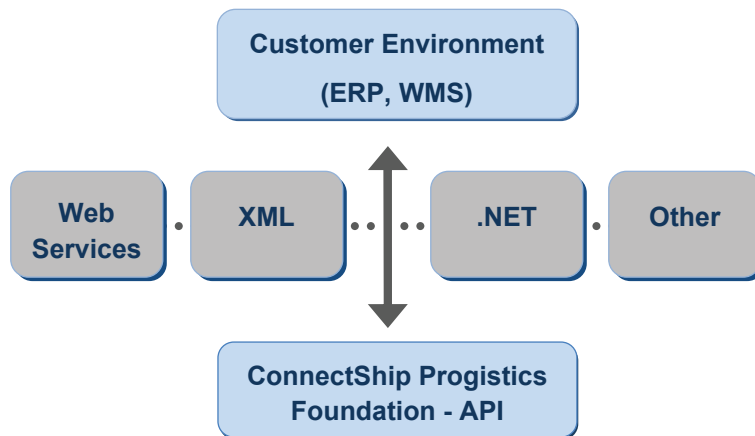

At ConnectShip | iShip, our goal is to make shipping software that fits into the way you do business and prepares you for growth. All ConnectShip on-premise solutions are based on the common technology called Prologistics. Prologistics means power for package shipment rating, shipping and electronic manifesting. The Prologistics technology powers all ConnectShip | iShip on-premise solutions, including Toolkit and Warehouse.
