ConnectShip | iShip
Toolkit Cloud

Faster Integration	Scalable	Cloud Managed

ConnectShip | iShip Toolkit Cloud

Toolkit Cloud allows access to the ConnectShip | iShip API solution (Toolkit) functionality online, without the requirement to install a dedicated onsite server, reducing the need for IT resources. Customer applications can use a hosted ConnectShip Toolkit installation from our state-of-the-art, secure data center. This minimizes the initial investment and reduces long-term mainte-nance expenses. Toolkit Cloud is available in a pay-as-you-go model, again reducing the initial investment cost.

Toolkit Cloud gives you a powerful and flexible technology base for building applications that will evolve with the future needs of your business.

Benefits of Toolkit Cloud

- Scalability and reliability
- Integrates via industry-standard interfaces
- Connects to Windows or non-Windows platforms
- Fastest throughput with unlimited customization
- Minimal technology footprint
- Reduced administration time
- Little to no local footprint
- Managed in the cloud by ConnectShip | iShip
- Maintained in dedicated, secure data center
- Single point of access for numerous locations

Toolkit *Cloud*

Toolkit Cloud is hosted in the ConnectShip | iShip data center in Bellevue, WA. Each Toolkit Cloud license includes access to AMP Online and our UPS Developer's Kit Shipping API Emulator. The UPS Developer's Kit Shipping API Emulator allows existing applications that use the UPS API to easily port to the ConnectShip | iShip Data Center without a need to recode the application. Toolkit Cloud is also the AMP interface used by on premise solutions.

Toolkit Cloud currently supports the following carriers:

- UPS
    - Small Package
    - Mail Innovations
    - Freight
    - Air Freight
    - Enhanced ShipAPI
